HRISHIKESH NIKAM

Boston, MA | Open to Relocation | (617) 371-7805 | nikam.h@northeastern.edu | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 4+ years building full-stack applications, APIs, and cloud services using Python, TypeScript, React, and Go/Python integrations. Experienced in software design, automated testing, CI/CD, and improving production performance.

PROFESSIONAL EXPERIENCE

IBM Lowell, MA
Software Developer Intern *Jun 2026 – Aug 2026*

- Developed **AI-powered FedRAMP application workflows** in IBM Bob, implementing interactive finding selection, explanation, remediation guidance, and re-validation experiences.
- Designed conditional application logic and frontend-to-backend interactions linking **SSP generation, normalized scan data, and AI services**.
- Integrated triggers for downstream re-scans and SSP updates, testing and debugging cross-component workflow behavior.
- Created reusable development-environment setup guides, **reducing onboarding time by 25%**.

Cybersenz Silicon Valley, CA
Software Development Co-op *Jan 2026 – Jun 2026*

- Developed **full-stack healthcare applications from scratch** with React, Python, FastAPI, databases, and Docker, from requirements gathering to implementation.
- Built **REST API integrations with PrognoCIS** supporting patient intake, document processing, registration, and multi-location scheduling; tested Epic sandbox APIs.
- Implemented **ElevenLabs AI voice-agent integrations** with FastAPI backend workflows for interactive conversations and appointment scheduling.
- Developed **cybersenz.com** with responsive pages, dynamic job listings, and protected contact/application workflows.

Infosys Limited Pune, India
Systems Engineer → Senior Systems Engineer → Technology Analyst *Nov 2020 – Jul 2024*

- Developed **React and TypeScript features** integrated with REST APIs and Go/Python microservices, **improving performance by 34%**.
- Translated requirements into Agile implementation tasks with stakeholders, **accelerating delivery by 27%**.
- Improved AWS deployment pipelines using GitHub Actions, Git, and Jenkins, **reducing release latency by 45%** and deployment friction by **39%**.
- Expanded automated testing and production monitoring, increasing test coverage by **42%** and resolving **92% of issues before escalation**.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, C
Full-Stack: React, FastAPI, REST APIs, HTML5, CSS, JSON, Database Integration, Go Services
Cloud & DevOps: AWS, Azure, Docker, Linux, Git, GitHub Actions, Jenkins, Azure DevOps, CI/CD
Engineering: Agile, Secure SDLC, Automated Testing, Debugging, Performance Optimization, Monitoring

SELECTED PROJECT

Reliable Transport Protocols & Performance Analysis *Northeastern University | C/C++*

- Implemented **Alternating-Bit, Go-Back-N, and Selective Repeat** in a network simulator, using ACKs, checksums, buffering, sequence numbers, and retransmission timers.
- Benchmarked protocol throughput under **packet loss, corruption, and varying window sizes**, analyzing reliability and performance trade-offs with automated experiments.

EDUCATION

Northeastern University Boston, MA
M.S. Computer Engineering — Computer Networks and Security *Dec 2026 | GPA: 3.76/4.00*

Rajarambapu Institute of Technology India
B.Tech. Electronics and Telecommunication Engineering *2020 | Best Outgoing Student*

CERTIFICATIONS

Google Cybersecurity Professional Certificate | ServiceNow CSA & CAD | Microsoft Azure Fundamentals (AZ-900)
